Double diaphragm pumps	X	X	
Dual peristaltic pumps			X
Interfaces with chilling & mixing system			X
Can be configured to run as an alternative circulator			X
Trough level detection with pump shut off	X	X	X

Why a Harris & Bruno Circulator?

Unlike other circulators, Harris & Bruno's line of circulators are seamlessly integrated into the LithoCoat (chamber/anilox) System. By choosing an alternative circulator you jeopardize the quality, reliability and performance of the LithoCoat System as well as forfeit you performance and 3-year product warranty. At Harris & Bruno International we take our commitment to your satisfaction seriously!

Still Not Sure Which One?

If you still aren't sure which circulator is right for you, contact us at anytime and we will be happy to provide you with a complimentary assessment of your current and future needs. With one of the largest sales & service departments available throughout the USA, Canada, Mexico, Europe, and Asia/Pan Pacific, we are committed to answering your questions to help assist you at anytime. Give us a call, TODAY!
