

### Printing Industry Partner:

Harris & Bruno International is offering a full-service anilox roll program! We are now the most vertically integrated supplier of anilox rolls in the USA with the following happening in our state-of-the-art machine shop:

- Core manufacturing
- Plasma coating
- Laser engraving
- Anilox cell measuring and certification
- Anilox cell cleaning

Offering a full-service anilox roll program is a natural progression for us since we have been making rolls, chambers and other printing press ancillaries for more than 60 years. Plus, with all the work happening under one roof in our Roseville, CA, plant, we are able to provide better process control, improved lead times and customer savings.

In order to show how dedicated Harris & Bruno is to answering all your anilox roll needs, we are offering you our free ASAP (Anilox Screening Audit Program) Diagnostic kit and our free Anilox Guide for Offset Coating Applications.

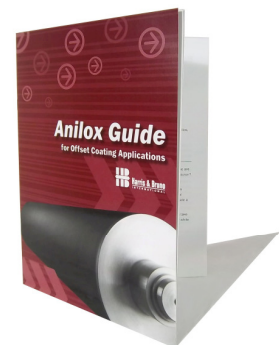

### ASAP Diagnostic Offers Free Anilox Roll Analysis

- The program consists of a self-test kit you can do while your roll is in the press, alleviating press downtime.
- With the supplied test strips, simply take impressions from three different places on the anilox roll.
- Once your test is complete, just drop it in the mail for Harris & Bruno. We've already prepaid the postage. We'll provide you with a free, in-depth analysis on the overall condition and cleanliness of your roll along with recommendations and microscopic pictures.
- If the roll requires cleaning, re-engraving, or if you need a new roll, Harris & Bruno has the technology and the experience to handle all your anilox roll needs.
- Request an ASAP Diagnostic kit either from your local H&B service or sales representative, or call our corporate headquarters at (916) 781-7676 and a kit will be promptly mailed to you. Be sure to request multiple kits if you'd like to test more than one roll.

### Anilox Guide is A Free Reference Manual for Mastering Coating Applications

- Our 15-page guide is meant to help customers realize how to take full advantage of anilox roll applications for outstanding coating and inking results.
- Details how to choose the perfect anilox cell volume and line screen, how to perform a coat weight test and more.
- To request an Anilox Guide in digital format or as a sturdy reference manual that could be handled often in the pressroom, please call our corporate headquarters at (916) 781-7676.

### Contact H&B for Any Anilox Roll Need
