

H&B CleanCell PRO Anilox Cleaning Kit

Improve roll lifecycle while reducing downtime due to quality issues!

Keepin' it Clean with CleanCell PRO

The first all-in-one preventative maintenance package for anilox roll cleaning. With the H&B CleanCell PRO Anilox Cleaning Kit, you no longer have the challenge of guessing if your rolls are clean— using 7 easy steps, you can clean your anilox rolls in or near your machine and be back up and running at optimum cell volume in no time. Establishing a routine of cleanings utilizing our CleanCell PRO Anilox Cleaning Kit can extend the usable life of your anilox rolls by months and possibly years.

Why H&B CleanCell PRO Anilox Cleaning Kit?

- Complete preventative maintenance package for anilox roll cleaning
- Maintain true cell volume of your anilox roll
- No harsh abrasives or manual scrubbing
- Identify fixable issues with your roll before paying for professional cleaning
- Deep clean a standard roll in less than 15 minutes

Your H&B CleanCell PRO Anilox Cleaning Kit includes:

- One bottle of CleanCell PRO
- Two bottles of CleanCell PRO Neutralizer
- Microscope for viewing anilox cells and to store or transfer photos
- Miniature SD card and adapter for microscope
- Spray gun calibrated for using CleanCell PRO cleaning solution and neutralizer
- Magnetic spray gun hanger

*CleanCell PRO is not formulated to 'rescue' anilox rolls that are severely plugged from daily use. CleanCell PRO is a maintenance cleaner that will preserve the cell volume of your anilox rolls and extend their usable life. Occasional off line deep cleanings using either plastic bead, baking soda, or laser technology are recommended.
