

Productivity Enhancement Package

Fine-tune your throughput and uptime

Our Productivity Enhancement Package will have your Harris & Bruno ExcelCoat coater running at peak efficiency. Have a difficult job that is just a pain to run? Show us what you're trying to achieve, and our technicians will train your team to run it as easily as possible. After working alongside your team, our technicians will inspect and adjust various components to make sure that your machine is in prime condition for the upcoming season.

Package Overview

Preparation for Service

- Speak with our service team before the visit
- Identify any specific concerns or hard-to-run jobs
- Review Uptime Kit options

First Day On-Site

- Review any difficulties with the coater
- Work with operators on hard-to-run jobs
- Inspect the coater based on observations
- Order any needed parts
- Start installing parts from Uptime Kit, if available

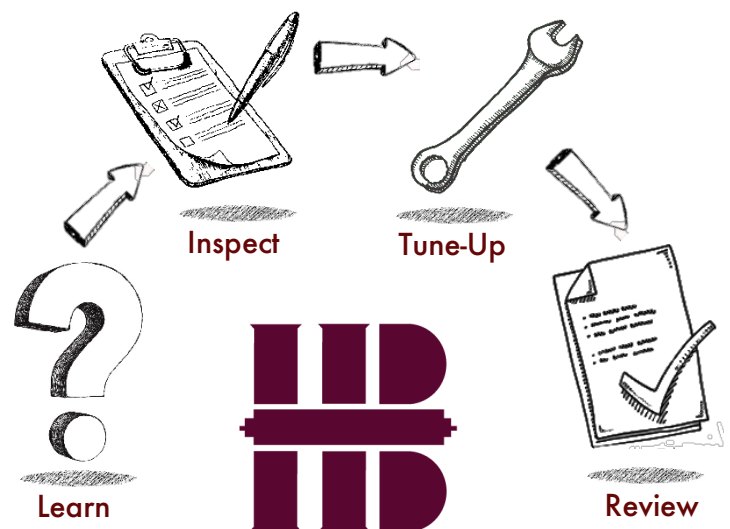

Second Day On-Site

- Calibrate anilox and impression rolls
- Inspect and adjust feeder and stacker cables
- Inspect and adjust main conveyor belt
- Inspect and adjust doctor & smoothing assembly
- Clean all sensors
- Visual inspection of pumping system
- Visual inspection of timing belts
- Visual inspection of IR and UV lamps
- Order any necessary parts
- Use parts from Uptime Kit, if available

Third Day On-Site

- Finish installing parts
- Review coater tune-up with the team
- Review best practices on coater

If any recommended services or part replacements cannot be completed in the same visit, a list of recommendations and priorities will be provided, and we will assist with coordinating a future service.

Increase Throughput and Efficiency

- **Calibration and fine tuning of your coater components**
- **Personalized training with our service technicians on your most difficult jobs**
- **Recommendations on how to improve productivity and uptime**
- **Inspections and adjustments to enhance machine performance**
